I have cultivated trees from 1 to 5 years old. Any person who wishes to get a very choice selection of fruit will do well to call and eximine, as I think I can furnish them with as good kinds as can be had in the country. Nearly all my cultivated trees are at my Nursery at Pine Lake, five and a half miles of the country. I shalf

been sit two years last spring, and were three years old when set; nearly all of these were cultivated at the nursery at White Pigeon. These trees have grown as vigorous and as fine as any I over saw in any country, and it is so acknowledged by all who have seen them. I had fruit on some of these trees this year, viz: apples, plums, peaches, cherries, grapes and currants, and they produced as fine fruit as the same kinds do in the state of New-York.

The apples which were so famously extelled in the Constantine Republican of the 3d of August last, from the New-Lowell Orchard, were from trees selected from the White I geon Nursery. I shall have grape and currant cuttings this fall; also a few pounds of Ruta Bags seed.

W ALUABLE SCHOOL BOOKS,— THE AMERICAN CLASS READER: THE AMERICAN CLASS READER: containing a series of lessons in Reading; with Introductory Exercises in Articulation, Induction. Emphasis, and the other essential elements of correct natur i Elecution: designed for Acadamies and common Schools. By George Witson, formerly Principal of the Canadaigua Academy, and late Principal of the Livingston Co. High School.

High School.

The design of the American Class-reader, is to teach scholars to read. It is not sufficient for this purpose, that a book be instructive and entertaining, and the selections chaste and classical in point of diction; it should be also properly adapted to exercise the reader in all the varied tones, inflections, and other requisities that belong to correct clocution.

Class Reader.

["This system of Arithmetic is disigned for the more advanced pupils in common Schools and Academies. It does not attempt to combine men tal arithmetic with the use of the slate, nor to units in one book a treatise for children of six, and for youths of sixteen years old. In montal arithmetic, every thing that could be desired, has been done by Colburn whose admirable little work is now so generally used and highly appreciated throughout the United States."

CANANDAIGUA, JULY 1, 1836.

CANADAIGUA, JULY 1, 1836.

Mr. Mers::
Sir—Having carefully examined "The American Class.Reader," by Gronge Wilson, I healtate not to express my opinion decidedly in its favor; because I deem it a work chaste in its selections, classical in point of diction, and admirably calculated to assist youth in becoming correct readers. I hope that it will be universally adopted in our schools.

I have also examined your "Practical and Theoretical Arithmetic," by the same author, containing saveral new methods of operation, and a new system of proportion; and heatate not to say, that it is the best work I have seen of the kind.

clocution.

Four lessons are inserted without punctuation. These will farnish tests of the degree of intelligence, and of attention to the sense, with which the pupil reads. They may also be used in teaching punctuation, and the use of capitals.

A considerable number of lessons have been selected from the Bibls. Apart from the importance and value of its divine instructions, the Sacred Scriptures abound in passages unrivalled in natural impressive eloquence, and admirably adapted to the purpose of improvement in elocution. In what is called the torical dialogue, selections can no where else be found at all comparable.
